GENERAL INFORMATION/INSTALLATION

**MortarCapture™** should only be installed by experienced masons with knowledge of collection and drainage systems consisting of flashing and weep.

Fast, and simple installation. Product does not require mechanical fastening or adhesion.

Ensure the wall is has no structural defects, and that all flashings and membranes have been properly installed.

Install **MortarCapture™** by placing a continuous strip on top of the flashing in the cavity. Place horizontally at the wall base to ensure the mortar droppings are suspending away from the weep holes.

Install **MortarCapture™** at all flashing locations including shelf angles, lintels, slab edges, through-wall penetrations and windowsills.
